

Meyrat & Perdrizet Questionnaire

This is intended as a very simple questionnaire, to identify how many variants exist, to see what range of serial numbers can be identified, and whether there is any obvious logic to the serial numbering. It should be answerable by a simple text file e-mailed to me at peterhopp678@btinternet.com, you can remain anonymous if you wish.
I will be turning the results into a simple report for the Oughtred Society Journal to be published some time soon after.
