

OTIS KING Calculators

A HISTORY of PRODUCTION 1920 – 1977

Colin Barnes and Tedford K. White

The first edition of this work was published in 1999. Since that time a considerable amount of new information has come to light, much of which is due to the researches of Ted White who has amassed a database of some 2000 examples of this calculator. Further information has been obtained from the authors' collections and from other slide rule collectors. This totally revised and extended edition includes information on Otis King, Carbic Ltd. and Whitton Precision Ltd. and details of the various patents. Also chapters

include details of some 13 design variants, scale arrangements, packaging details, instruction sheets, a record of the evolution of bases and caps and finally an analysis of recorded examples with a guide to total production figures and dating.
